

**Dear Valued Customer,**

We want to keep you informed about recent developments regarding tariffs that may impact the foodservice and HVAC parts industry. As of March 4, 2025, the U.S. government has imposed a 25% tariff on imports from Canada and Mexico. In response, the Canadian government has implemented retaliatory tariffs on certain U.S. goods.

At Parts Town Canada, we are closely monitoring the situation to understand its potential impact on pricing and supply chain operations. Here's what we are doing to support you:

- **Monitoring the Situation:** We are closely monitoring the evolving tariff situation and assessing potential implications for Canadian businesses and manufacturers.
- **Collaborating with Partners:** Our teams are actively evaluating the impact of these tariffs by analyzing country of origin data and working closely with our manufacturer partners.
- **Optimizing Supply Chain:** We continue to optimize our supply chain and maintain one of the largest inventories of OEM foodservice and HVAC parts across our network of Global and Regional Fulfillment Centers.
- **Canadian Operations:** We have a dedicated team of 35+ members on the ground in Canada, ensuring localized expertise and support through Parts Town Canada operations.

We will continue to monitor the situation and provide any updates as they become available. We do not anticipate immediate disruptions in our ability to fulfill your orders, but we will keep you updated should any changes arise.

If you have any questions or concerns, please do not hesitate to reach out to the Parts Town Canada team.

Thank you for your continued partnership!

**Genuinely,**

Parts Town Canada Team
