RECEIVING & SETUP

UNPACKING

Remember to save all packing materials - including any crating, boxes, liners, and boards. You may need these for shipping your machine or should a repair be necessary in the future.

INSPECTION

Inspect your machine for hidden shipping damage. Contact the delivery company immediately, should you find damage.

PLATEN SURFACE

Slight surface imperfections are a normal part of the aluminum casting process for the platens on your press. These are not considered a defect and do not affect the functionality of the machine in any way.

OPERATION

INSTALLATION

Remove from box (keep box just in case your need to return). Team lift, as the machine is very heavy.

1. With the press in the open position, adjust the press to the desired thickness by turning the control knob located on the top of the machine. Thickness is reduced by turning the knob **clockwise** and increased by turning it **counterclockwise**, as indicated. Using the thickness control knob, turn right for thinner or left for thicker until you have the thickness you desire.
CAUTION: DO NOT OPERATE THIS PRESS WITH ANY OTHER PERSON(S) / HAND(S) NEAR YOU OR THE PRESS. SERIOUS INJURY COULD RESULT.
2. Pull the handle down all the way, applying pressure, until it stops. Raise the handle all the way up.
3. Rotate the lower platen out and remove your flattened product.

CLEANING & MAINTENANCE

CLEANING THE PLATENS

1. Open the platen for easier access.
2. Clean the platens with with a mild soap and warm water applied with a soft cloth or sponge. Do not use steel wool, scrub sponges, kitchen or oven cleaners, or any other kind of abrasive material. This will damage the coating
3. Wipe clean with a dry cloth.

CLEANING THE OUTSIDE SURFACES OF THE MACHINE

Use a mild soap and warm water applied with a soft cloth or sponge. Do not use steel wool, scrub sponges, kitchen or oven cleaners, or other abrasives that will damage the painted surface.

LUBRICATION

Your press requires lubrication every 15,000 cycles or every 6 months. Use NSF/NLGI 2 rated food grade grease (such as Bel-Ray No-Tox #2 or equivalent). Lubricate all moving or hinged points.
