BEFORE INSTALLATION

Upon receipt of this unit, immediately unpack and remove any protective packaging to inspect for possible concealed shipping damage. If unit is found to be damaged, save all packing materials and contact your delivery carrier within five (5) days. If there is apparent damage:

In U.S.A. and Canada: Arrangements should be made to file a claim against the carrier as Interstate Commerce Regulations require that the claim must be initiated by the consignee.

In Other Countries: Freight terms will be developed and extended on an individual basis.

Failure to follow these instructions will negate Merco's or your ability to file claims and receive compensation for shipping damage.

GENERAL INFORMATION

The Contempo style warmers are manufactured from specially selected alloys for long life and easy cleaning. Models are available in stem mount, cord mount, fixed mount, adjustable wall or overhead mount and retractable cord mount. All of which are available with Trac-Heat option. Contempo Warmer Lamps are made to exact specifications and it is not recommended that they be modified in the field.

CONNECTION

INSTALLATION

1. Check the specification data plate for the correct model number and voltage.
2. Check to insure the electric circuit being used to supply electricity to the unit has a sufficient amperage rating.
3. NOTE: All 120V units will wire the same. Black to black, white to white, and green to ground.
4. Trac-Heat wires the same as standard units.

NOTE: Install this unit in the most convenient location for ease of cleaning, maintenance and general operation. Avoid installing in locations with drafts, close proximity to grease or vapor-producing appliances or other high ambient heat equipment. Allow sufficient overhead clearance for proper heat dissipation.

CONTEMPO INSTALLATION INSTRUCTIONS

Secure the top portion of the lamp to the ceiling with the two 8-32 threaded rods provided - as shown in the diagram.

NOTE: A 4" round electrical box attached to a beam is preferred to hold the weight and the adjusting of the lamp up and down.

ELECTRICAL ATTACHEMENTS

**BLACK TO BLACK
WHITE TO WHITE
GREEN TO GROUND**

OPERATION

1. After installation, turn switch to the on position.
2. For retractable style lamps, mechanism "catches" in increments in 4 1/2" steps.
3. For retractable style lamps, always pull lamp straight down - not at an angle!
4. For retractable style lamps, pull lamp to desired length plus 2 inches. Lamp will retract to nearest catch point.
5. To fully retract a retractable style lamp, pull down 1 1/2" and release.
6. Lamps should be a minimum clearance of 16" away from the countertop surface.

NOTE: On retractable units, due to tension in the coiled cord, when extending lamp beyond 53", the retractor cable become slack and may loop. This is normal. Cable will relax with use. To retract, pull slack out plus 1 1/2" and release.

CLEANING

1. Be sure to unplug or disconnect power from units before cleaning.
2. Allow 15 minutes for units to cool down to prevent burns.
3. Clean with a soft, damp, soapy cloth.
4. Rinse with a soft, damp cloth.
5. DO NOT use any abrasive cleaners or harsh chemicals as this could discolor the finish.
