

GAS ROTISSERIE

« PERFORMANCE » RANGE « FLAMBOYANT »

Ref.: 1600.8PG		1600.6PAG	
1400.8PG	1400.6PAG	1400.6PG	1400.4PG
1160.8PG	1160.6PAG	1160.6PG	1160.4PG

INSTALLERS MANUAL

1. PRESENTATION OF THE APPLIANCE

1.1. GENERAL

Rotisseries range « Flamboyant » gas powered and electricity at a voltage of 208/230V + earth.

Reference	Length (inch)	depth (inch)	Height (inch)	weight (lb)	Gas power (btu/h)	Electricity	
						Power (W)	Amps
1600.8PG	62	23 1/4	69 7/8	650	181000	670	4,5
1600.6PAG	62	23 1/4	69 7/8	628	136000	590	4
1400.8PG	54 1/8	23 1/4	69 7/8	530	151000	670	4,5
1400.6PAG	54 1/8	23 1/4	69 7/8	510	113000	590	4
1400.6PG	54 1/8	23 1/4	55 1/8	405	113000	590	4
1400.4PG	54 1/8	23 1/4	40 3/8	310	76000	510	4
1160.8PG	45 1/8	23 1/4	69 7/8	430	103000	520	3
1160.6PAG	45 1/8	23 1/4	69 7/8	416	77000	440	3
1160.6PG	45 1/8	23 1/4	55 1/8	330	77000	440	3
1160.4PG	45 1/8	23 1/4	40 3/8	243	52000	360	2,5

The unit is for professional use and must be used by a professional person.

Before starting any operation, please see these instructions. The carefully kept available near the rotisserie

While cooking appliance generates heat and particles of fat.

It is advisable to provide for their installation in premises protected anti-fire and ventilated mechanically accordance with safety regulations and health standards relating to trades mouths (please check with specialized companies and agreed on the benefits of work to be done according to safety standards: ventilation (extraction), plumbing (water, gas protection, fire, etc. ...), electricity, building (anti-slip tiles, firewall, etc. ...).

The installation must conform with local codes or, in the absence of local codes, with the National Fuel Gas Code, ANSI Z223.1/NFPA 54, Installation Code or natural gas and propane, CSA B149.1 , if any.

The appliance and its individual shutoff valve must be disconnected from the gas supply during any pressure testing of that system at test pressures in excess of 1/2 psi (3.5 kPa).

The appliance must be grounded in accordance with local codes or, in the absence of local codes, with the National Electrical Code, ANSI / NFPA 70, or the Canadian Electrical Code, CSA C22.2, as applicable

For maintenance and repairs, you must contact the factory, the factory representative or local service company.

We advise you to hire a qualified dealer for connection and start of the roasting pan as long as reservations are electric and gas conducted by certified companies, authorized by you, and hold near the location of the cooking appliance.

Interventions on electrical parts must be performed by qualified personnel in the compliance with regulations in force

The company is not liable for damages in case of:

- incorrect use of the device
- non-compliance with regulations in force
- proper installation
- non-compliance with the details regarding the maintenance
- Any unauthorized changes
- installation of spare parts unoriginal
- installing and using the rotisserie different than those provided by the manufacturer

In case of suspicious odors of gas in place of the rotisserie, stop it by closing valves gas supplies and the power supply.

If gas odors persist, call the local gas supplier.

AVERTISSEMENT

Mise à la terre

Cet appareil est pourvu d'une fiche à trois broches dont une mise à la terre assurant une protection contre les chocs. La prise dans laquelle elle est branchée doit être correctement mise à la terre. Ne pas couper ni enlever la broche de mise à la terre de la fiche.

WARNING

Electrical grounding instructions

This appliance is equipped with a three-prong (grounding) plug for your protection against shock hazard and should be plugged directly into a properly grounded three-prong receptacle. Do not cut or remove the grounding prong from this plug.

1.2. SITE OF THE MANUFACTURER'S PLATE

The manufacturer's plate is located on the back right in the middle of the upright.

All this information are the property of Rotisol.
Reproduction partial or in totality are prohibited without authority prior written of company Rotisol.

1.3. COMPULSORY MARKINGS

STUCK ON THE PACKING AND ON THE FRONT ON THE UNIT

INSTALLATION ET UTILISATION

- Installer en dessous d'une hotte de ventilation seulement.
- Ne pas installer cet appareil sous des surfaces combustibles non protégées
- ATTENTION. Le régulateur de pression fourni avec cet appareil doit être utilisé. Ce régulateur est réglé pour une pression de sortie de 8 pouces de colonne d'eau.
- L'alimentation en gaz doit être coupée à la bouteille d'alimentation en gaz PL lorsque cet appareil n'est pas utilisé.
- Installer dans des locaux faits de matériaux incombustible seulement

INSTAL AND USE

- For installation under ventilation hood only.
- Do not locate this appliance under overhead, unprotected combustible surfaces.
- CAUTION. The gas pressure regulator provided with this appliance must be used. This regulator is set an outlet pressure of 8 inches water column.
- The gas supply must be turned off at the LP-gas supply cylinder when this appliance is not in use.
- For use on noncombustible floors locations only

2. INSTALLATION

- The device must be installed in accordance with regulations and standards, in an adequately ventilated .
This work are at the client cost, that he needs to have done by are a agreed company, near the position that the rotisserie is to be enforce them,by companies.
- The new air flow require for the combustion is : 20,7 ft³/h per 1000 btu/h of the calorifique flow.
- The gas supply must be turned off at the supply bottle LP gas (propane) when the unit is not used.

2.1. SETTING UP

2.1.1. UNPACKING

Unpack the rotisserie that is circled, filmed and fixed on palette.

2.1.2. INSTALLING THE UNIT NEXT TO WALLS AND APPLIANCES

The unit with glace door open should be placed at a distance minimum of ¾" to adjacent walls.

2.1.3. APPLIANCE EQUIPPED WITH WHEELS

The device must be placed on a perfectly level ground and locked in a stationary position for use and et le stockage.

2.1.4. ENVIRONMENT

The device should not be installed near the steam,grease (frying,...), projections of water, high températures or other adverse condition.
Do not install this unit under unprotected combustibile surfaces.
Keep the area of the machine free, and free of combustibile materials.

2.2. GAS CONNECTION

Connect the rôtisserie to the gas supply, with interposing a block valve to isolate this one from the rest of the installation.

The gas supply conduct will be sized to minimize losses. Its diameter will be determined according to its path (length, number of bends, tees ...) and of the total power of the rotisserie.

"Check that the adjustments correspond to the nature and pressure of gas distributed in the installation".

CAUTION : The pressure regulator (Maxitrol) supplied with this unit must be set according to the gas used.

To check the gas supply pressure to the unit simply connect a manometer to the water column on the pressure tapping located on the connection side of the unit gas when all the burners are ignited.

The gas pressure measured and must be equal to that shown on the rating plate for the gas used
Supply valves gas rotisserie require no adjustment for extra service life.

2.2.1. GAS CIRCUIT DIAGRAM

All this information are the property of Rotisol.

Reproduction partial or in totality are prohibited without authority prior written of company Rotisol.

2.2.2 POSITION OF THE INJECTOR, THERMOCOUPLE AND RING AIR

ADJUSTING AIR:

Natural Gas (pressure 7" wc)_ E= 1/8"

Propane Gas (pressure 11" wc)_ E = OPEN MAX

2.2.3. FIXED INSTALLATION – MOBILE INSTALLATION

FIXED

Connection type union 1 or 2

The use of **TURBOGAZ** or **similar** in professional fixed installations, will permit a total liberty in the conception of the kitchen.

MOBILE

The conception of a kitchen with mobile gas appliance is possible thanks to a tandem of TURBOGAZ – TUSHGAS or SIMILAR.

FLEXIBLE PIPING IN THE SHAPE OF U

Measure of the gas flow under 20 mbar in kW/h PCI (natural gaz)

	Ø1/2" R* = 90 mm		Ø 3/4" R* = 110 mm		Ø1" R* = 130 mm	
	Without PUSHGAZ	With PUSHGAZ	Without PUSHGAZ	With PUSHGAZ	Without PUSHGAZ	With PUSHGAZ
0,50 m	25,3	21,5	93,6	80,6	186,2	129,4
0,75 m	21,6	19,0	81,7	69,4	160,9	120,3
1,00 m	19,4	17,5	76,8	67,9	144,9	116,4
1,25 m	18,2	16,5	71,0	64,0	131,8	106,4
1,50 m	17,0	15,7	66,5	60,2	120,3	98,8
2,00 m	14,2	13,2	58,8	54,9	107,2	93,0

*R = minimum bend radius of hose

These flow are given for conditions of reference, note

: Temperature 15°C

: Atmospheric pressure : 1013 mbar

: Dry air

- The hose must not touch a hot wall
- For safety, please install a shorter cable or chain than the gas pipe between the rotisserie and a fixed wall.

All this information are the property of Rotisol.

Reproduction partial or in totality are prohibited without authority prior written of company Rotisol.

2.3. ELECTRICAL CONNECTION

Verify that there no errors of **CONNECTION** .

- Power supply: 230V~60Hz.
- Check if the electric voltage of sector corresponds to the characteristics indicated on the nameplate affixed to the bottom left of the rotisserie.

IN ALL CASES, CONNECT THE EARTH WIRE.

THE UNIT IS SUPPLIED IN SINGLE PHASE + EARTH.

AVERTISSEMENT : Pour une protection continue contre le feu et les décharges électriques, remplacer les fusibles de 10 ampères

WARNING : For continued protection against fire and electric shock replace with 10 Ampere fuse

2.4. SMOKE EVACUATION TYPE: A

- The device is intended to be installed under a hood with ventilation.
- A removable deflector can be positioned above the rotisserie on the opening of top.

3. ADAPTATION OF THE UNIT IN CASE OF PASSAGE OF A GAS TO ANOTHER

The appliance is automatically set at the factory depending on the gas specified to the command

3.1. CHANGE OF INJECTOR.

3.1.1. DISASSEMBLY OF THE INJECTOR

- _ Remove the left outer panel
- _ Loosen the nut 90 ° bend on the pipe gas supply
- _ Remove the ring setting the primary air
- _ Remove all, 90 ° bend , injector holder and injector, by unscrewing completely this all
- _ Unscrew and remove the injector with a key

3.1.2. MOUNTING OF THE INJECTOR

- _ Screw thoroughly the injector (without straining) on the injector holder with a key
- _ mount all, 90 ° bend , injector holder
- _ Set the position of the ring of the primary air
- _ Tighten the nut 90 ° bend on the pipe gas supply
- _ Make a complete test of leak of the gas circuit
- _ Remit the outer panel

3.2. ADJUSTING OF THE PRIMARY AIR

Simply adjust the opening of the ring of air based for gas used (see rated E chapter 2.2.2.)

3.3. ADJUSTING OF THE MAXITROL REGULATOR

SETTING THE REGULATOR MAXITROL (USA)

This operation is to be performed during the first test run after connecting the device.

- Remove the screw closure of the pressure tap with a screwdriver.

- Connecting a pressure gauge to the pressure tap by means of a rubber hose.
- Open the gas valve of the rotisserie.
- Light the burners of the rotisserie.

- Remove the screw of protection of regulator setting with a screwdriver.

- Turn the adjustment screw with a screwdriver so that the pressure gauge reading corresponds to the pressure applied.

- Replace the screw of protection of regulator setting.
- Turn off the burners.
- Close the gas valve of the rotisserie.
- Remove the connecting tube the pressure gauge.
- Replace the screw closure of the pressure tap.

3.4. FLOW SETTING REDUCED AND IDLING ADJUSTMENT

3.4.1. FLOW SETTING REDUCED

Connect a pressure gauge on the pressure tap and adjust the required pressure using the adjustment screw of flow reduced:

SEALING THE SETTING

3.4.2. IDLING ADJUSTMENT

Put the knob of the gas valve on position "minimum"

Connect a pressure gauge on the pressure tap and adjust the required pressure using the adjustment screw of idling:

SEALING THE SETTING

3.5. TABLE SETTING OF A BURNER

MODEL	CARACTERISTIC	Natural Gas (7 " wc)	Propane Gas (11 " wc)
1160	Injector identification	165	115
	Injector diameter in inches	0,065	0,045
1400	Injector identification	180	130
	Injector diameter in inches	0,070	0,051
1600	Injector identification	190	140
	Injector diameter in inches	0,075	0,055

* Open the primary air: see position of the ring primary control chapter 2.2.2.

CHANGE OF INJECTOR AND ADJUSTMENT OF THE PRIMARY AIR

- Remove the outer panel left

- With a 23 key loosen the nut on the valve supply pipe gas burner.

- With a wrench 19 to loosen the nut 90 ° elbow on the gas supply pipe by blocking the 90 ° elbow with a wrench 17.
- Turn the gas supply pipe up.

- Remove all 90 ° elbow, injector holder and injector by unscrewing the set completely.

- Unscrew the injector with a wrench de17 blocking the injector holder with a wrench 24.

- Tighten but without forcing the new injector on the injector holder.

- Refit the 90 ° elbow, injector holder and injector.

- Using a wrench 7, loosen the screw holding the ring of air and pull back out.

- Using a wedge, adjust the position of the injector to the coast of 3/8" compared to the inside of the air intake sleeve (see instructions installer, chapter position of the injector and setting ring of the primary air).

- Using the keys used during disassembly reposition the gas supply pipe.

- Using a wedge to adjust dimension "D" position of the ring of air over the inner sleeve of the air intake (see Table installer instructions "setting a burner") .

- Block the air ring with the wrench 7.
- Make a complete leak test gas circuit.
- Replace the outer panel.

CONTROL CIRCUIT GAS SEAL WITH A SPRAY DETECTOR GAS LEAK.

- Remove the outer panel left.
- Connect to the network rotisserie gas.
- Light the burners.

- Using a spray can "leak detector gas" spray in the direction of all the connection point of the circuit gas.

- If there is rapid formation and / or bursting of large bubbles, review the application and assembly of components for connecting the gas line.
- Repeat until the complete elimination of bubbles.
- Turn off burner.
- Replace the outer panel left.

DISASSEMBLY AND REASSEMBLY PILOT AND THERMOCOUPLE

- Remove the outer panel left

- Unscrew the hollow screw connecting the thermocouple to gas valve using a wrench 8.

- Remove the cell contact of the thermocouple to the gas valve.

- Unscrew the hollow screw connecting the gas supply tube to the pilot with a wrench 10.

- Remove the feeding tube gas pilot.

- Unscrew and remove the retaining nut for all pilot / thermocouple with a wrench handle 7.

- Remove all pilot / thermocouple.

- Removed with a screwdriver and two screws in the retaining flange of the pilot and the thermocouple.

- Remove the pilot or thermocouple.

- Coincidence to the two holes in the flange of the new pilot.

- Collect and provide both sides of the new pilot (flame and supply pipe) in the middle of the retaining flange on which come to tighten the two screws.

- Insert the new thermocouple below in relation to the pilot.
- Put the 2nd part of the flange at the top and secure the assembly with two screws using the screwdriver.

- Then do the inverse operations to move up all pilot / thermocouple being careful not to fully tighten the screws connecting the thermocouple to the gas valve so as not to damage the cell's contact thermocouple on it.

DISASSEMBLY AND REASSEMBLY PILOT AND THERMOCOUPLE (OTHER MODELS).

- Remove the outer panel left.

- Unscrew the lock nut connecting the thermocouple to gas valve using a wrench 9.

- Remove the cell contact of the thermocouple to the gas valve.

- Unscrew the lock nut connecting the gas supply tube to the pilot using a wrench 12.

- Remove the supply tube gas pilot.

- Unscrew and remove the retaining nut of the whole pilot / thermocouple with a wrench handle 7.
- Then do the inverse operations to move up whole pilot / thermocouple being careful not to fully tighten the screws connecting the thermocouple to the gas valve so as not to damage the cell's contact thermocouple on it.

- Remove whole pilot / thermocouple.

REPLACEMENT ENGINE

- Disconnect power from the rotisserie.
- Remove the outer panel right.

- Remove the plastic tie holding the cables.

- Disconnect the engine pods.

- With the help of a wrench handle 10, unscrew and remove the two nuts on the back of high and low slides supporting the motor.

- With the same key, loosen the 2 nuts at the front of the slides.

All this information are the property of Rotisol.
Reproduction partial or in totality are prohibited without authority prior written of company Rotisol.

- Spread the double slides.

- Remove the engine and shield against greases.

- For installation a new motor, perform the inverse being careful to reposition the motor protection plate in the two doubles slides .

All this information are the property of Rotisol.
 Reproduction partial or in totality are prohibited without authority prior written of company Rotisol.

GREASE THE ROTISSERIE MOTOR

- Disconnect power from the rotisserie.

- Remove the outer panel right.

- Remove the 2 screws of the coil using a Phillips screwdriver.

- Remove the landing.

- Remove the coil.

- Remove the rotor.

- Place the tip of the syringe grease on the hole of the rotor axis.
- Push in two or three times on the syringe grease.
- Operations to reverse back to the engine.

- Tap lightly with the handle of a screwdriver on the spool to center the rotor axis relative to the ball bearing of the bearing.
- Proceed in the same way for other engines.
- Replace the outer panel right.
- Reconnect the power supply to the rotisserie.

4. ELECTRIC DIAGRAM

- _ Engines and terminal are located inside the right amount
- _ Switches and white pilot are located on the front of the unit on the right side.
- _ The one or many halogen lamps are located in the cap.

ELECTRIC DIAGRAM OF ROTISSERIE : 1600.8PG, 1400.8PG, 1400.6PG , 1400.4PG, 1160.8PG, 1160.6PG and 1160.4PG

For the **1600.8PG** rotisserie, there are **8 motors and 2 halogen lamps**.
For the **1400.8PG** rotisserie, there are **8 motors and 2 halogen lamps**.
For the **1400.6PG** rotisserie, there are **6 motors and 2 halogen lamps**.
For the **1400.4PG** rotisserie, there are **4 motors and 2 halogen lamps**.
For the **1160.8PG** rotisserie, there are **8 motors and 1 halogen lamp**.
For the **1160.6PG** rotisserie, there are **6 motors and 1 halogen lamp**.
For the **1160.4PG** rotisserie, there are **4 motors and 1 halogen lamp**.

All this information are the property of Rotisol.
Reproduction partial or in totality are prohibited without authority prior written of company Rotisol.

ELECTRIC DIAGRAM OF ROTISSERIE: 1600.6PAG, 1400.6PAG and 1160.6PAG

For the **1600.6PAG** rotisserie, there are **6 motors and 2 halogen lamps**.
 For the **1400.6PAG** rotisserie, there are **6 motors and 2 halogen lamps**.
 For the **1160.6PAG** rotisserie, there are **6 motors and 1 halogen lamp**.
