85142	85140	Partition (4)
85143	85140	Plate Support
85147	85140	Shroud Assembly
85167	85220	Shroud Assembly
85169	85220	Top
85175	85220	Pan, 5 X 5, 6" Deep
85194	85220	Pan, 5 X 10, 4" Deep
85195	85220	Partition (2)

CLEANING: Before first use and after use daily, disassemble and clean unit. Stainless steel parts can corrode. It is important to clean, rinse, sanitize, and dry these parts daily and properly. Failure to comply with any of these instructions may void unit warranty:

1. WIPE EXTERNAL SURFACES OF UNIT WITH A CLEAN DAMP CLOTH DAILY. DRY WITH A CLEAN SOFT CLOTH.

- A mildly abrasive nylon or brass brush may be used to remove any food or mineral deposits on the unit.
- Do not use any highly alkaline or acidic solvents, steel wool, or other harsh abrasives to clean unit.
- Do not use abrasive cleansers, scrapers, steel pads, steel wool, or other cleaning tools that can scratch surfaces.
- A general purpose, nonabrasive cleaner may be used on hard to remove food deposits.
- A nontoxic glass cleaner may be used for cleaning any stainless steel parts and the lid.

2. SANITIZE PARTS FOLLOWING YOUR LOCAL SANITIZATION REQUIREMENTS. ALL PARTS IN CONTACT WITH FOOD MUST BE SANITIZED.

3. ALLOW PARTS TO FULLY AIR DRY AFTER SANITIZATION.

Various elements and minerals, such as chlorides in tap water, can accumulate on stainless steel parts and create corrosion.

To prevent corrosion on any stainless steel parts, it is important to fully air dry, as required after sanitization, or to fully dry with a clean soft cloth regularly.

SAFETY GUIDELINES: Stainless steel is one of the best materials for food serving and storage, but there are many products which can corrode it.

If you notice corrosion beginning on any stainless steel surface, you may need to change the cleansing agent, sanitizing agent, or the cleaning procedures you are using.

- Products containing: acids, alkalines, chlorine, or salt can corrode stainless steel.
- Sauerkraut corrodes stainless steel. Server Products Inc. regrets that we can not honor warranty claims on stainless steel parts that have been affected by sauerkraut.

Do not place ice packs or crushed ice into non-insulated units, they are not designed to hold water and will leak.
