SONY®

MODEL LIST

<u>MODEL</u>	<u>COLOR</u>	<u>COMMANDER</u>	<u>DEST.</u>	<u>MODEL</u>	<u>COLOR</u>	<u>COMMANDER</u>	<u>DEST.</u>
KD-60X690E	Black	RMT-TX300U	UC2/LA1				
KD-70X690E	Black	RMT-TX300U	UC2/LA1				
KD-60X695E	Black	RMT-TX300B	AR4/LA8				
KD-60X697E	Black	RMT-TX300B	CO1				
KD-60X6700E	Black	RMT-TX300E/300P	AZ1/ME6/EA4				
KD-70X6700E	Black	RMT-TX300E/300P	AZ1/ME6/EA4				

WARNINGS AND CAUTIONS

CAUTION

These servicing instructions are for use by qualified service personnel only.

To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

WARNING!!

An isolation transformer should be used during any service to avoid possible shock hazard, because of live chassis.

The chassis of this receiver is directly connected to the ac power line.

CARRYING THE TV

Be sure to follow these guidelines to protect your property and avoid causing serious injury.

- Carry the TV with an adequate number of people; larger size TVs require two or more people.
- Correct hand placement while carrying the TV is very important for safety and to avoid damages.

SAFETY-RELATED COMPONENT WARNING!!

Components identified by shading and ! mark on the schematic diagrams, exploded views, and in the parts list are critical for safe operation. Replace these components with Sony parts whose part numbers appear as shown in this manual or in supplements published by Sony. Circuit adjustments that are critical for safe operation are identified in this manual. Follow these procedures whenever critical components are replaced or improper operation is suspected.

USE CAUTION WHEN HANDLING THE LCD PANEL

When repairing the LCD panel, be sure you are grounded by using a wrist band.

When repairing the LCD panel on the wall, the LCD panel must be secured using the 4 mounting holes on the rear cover.

- 1) Do not press on the panel or frame edge to avoid the risk of electric shock.
- 2) Do not scratch or press on the panel with any sharp objects.
- 3) Do not leave the module in high temperatures or in areas of high humidity for an extended period of time.
- 4) Do not expose the LCD panel to direct sunlight.
- 5) Avoid contact with water. It may cause a short circuit within the module.
- 6) Disconnect the AC power when replacing the backlight (CCFL) or inverter circuit. (High voltage occurs at the inverter circuit at 650Vrms.)
- 7) Always clean the LCD panel with a soft cloth material.
- 8) Use care when handling the wires or connectors of the inverter circuit. Damaging the wires may cause a short.
- 9) Protect the panel from ESD to avoid damaging the electronic circuit (C-MOS).
- 10) It is recommended not to exceed 1 hour of Power-On nor Burn-in period with LCD panel face down condition, in repair activity.

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety checks before releasing the set to the customer:

1. Check the area of your repair for unsoldered or poorly soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the interboard wiring to ensure that no wires are “pinched” or touching high-wattage resistors.
3. Check that all control knobs, shields, covers, ground straps, and mounting hardware have been replaced. Be absolutely certain that you have replaced all the insulators.
4. Look for unauthorized replacement parts, particularly transistors, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
5. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
6. Check the line cords for cracks and abrasion. Recommend the replacement of any such line cord to the customer.
7. Check the antenna terminals, metal trim, “metallized” knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.
8. For safety reasons, repairing the Power board and/or Inverter board is prohibited.

Leakage Test

(To protect electric shock when customer touch the terminal.)

Leakage current can be measured by V: Voltmeter or oscilloscope (r.m.s. or peak reading)

Stabilized power supply instrument and isolated voltage transformer: Use too much current capacity and isolated voltage transformer does not need to use stabilized power supply equipment Specification of RMS volt meter: Input resistance > 1 M ohm, Input capacitance < 200 pF, Frequency range: 15 Hz – 1MHz (Refer Figure A). Isolated type volt -meter (FLUKE 8921A etc *1)

*1 Not use FLUKE 8920A that connected to protective earth by diode

Leakage current of measurement instrument is less than 10μArms when under test equipment AC plug is opened # Set up the following condition and turn on the set.

Applied voltage: Nominal input voltage (Description on Nameplate) # Measure the leakage current between one phase conductor and neutral for terminal A and terminal B.

Read rms value, and then calculate to peak value $\text{PEAK VALUE} = \sqrt{2} \text{ RMS VALUE}$

Comply with the following requirement Class II equipment (2-pin plug): for each terminal, the worst value of measurement must not exceed AC 350uA peak). Note: including AC adaptor, AC adaptor/DC operated unit combination

Figure A. Measuring network for Leakage Current

How to Find a Good Earth Ground

A cold-water pipe is a guaranteed earth ground; the cover-plate retaining screw on most AC outlet boxes is also at earth ground.

If the retaining screw is to be used as your earth ground, verify that it is at ground by measuring the resistance between it and a cold-water pipe with an ohmmeter. The reading should be zero ohms.

If a cold-water pipe is not accessible, connect a 60- to 100-watt trouble- light (not a neon lamp) between the hot side of the receptacle and the retaining screw. Try both slots, if necessary, to locate the hot side on the line; the lamp should light at normal brilliance if the screw is at ground potential (see Figure B).

Figure B. Checking for earth ground.

SELF DIAGNOSIS FUNCTION

Error Items	Number of LED flashing	Go to Shutdown State	Description
MAIN_POWER	2	Yes	Detect and observe main voltage (1) 19.5V from AC adapter (2) 12V from power board (TBD)
AUD_ERR	3	Yes	Detecting/Observing audio AMP error
AUD_I2C	3	Yes	Audio AMP communication error
TU_DEMOD	-	No (Only record error log)	Tuner & Demodulator I2C communication monitoring. Tuner Detect signal monitoring.
PANEL_POWER_ERR	4	Yes	Detect and observe for Panel_12V
PANEL_I2C_ERR	5	Yes	Detect Panel I2C Communication access error
BACKLIGHT	6	Yes	Detect and observe backlight error
LED_I2C	6	Yes	LED Driver communication error
BE_I2C	-	No (Only record error log)	BE device I2C communication error detection.
PMIC_I2C	-	No (Only record error log)	PMIC communication error

[SELF DIAGNOSTIC SCREEN DISPLAY]

Since the diagnostic results displayed on the screen are not automatically cleared, always check the self-diagnostic screen. After you have completed the repairs, clear the result display to "0".

Clearing the Self Check Diagnostic List

1. Error history and Error count : Press the Channel 8 => Channel 0 .
2. Panel operation time : Press the Channel 7 => Channel 0 .

Exiting the Self-diagnostic screen

To exit the Self Diagnostic screen, turn off the power to the TV by pressing the POWER button on the remote or the POWER button on the TV.

SEC 1. DISASSEMBLY AND PARTS LIST

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

The components identified by shading and mark  are critical for safety. Replace only with part number specified.

The components identified by mark  contain confidential information. Strictly follow the instructions whenever the components are repaired and/or replaced.

APPENDIX-2 Software data update

SOFTWARE DATA UPDATE

■ THE CONFIRMATION OF THE SOFTWARE VERSION OF THE TV SET

Entering product information of setting menu.

Press the buttons on the remote commander as below

Note: When changing Main board, Model Name and Serial Number will not be displayed.

[HOME] - [Settings] – [Preferences] - [Set-up] –[Customer Support]-[Product Information]

or [HOME] - [Settings] – [Preferences] - [Set-up] - [Customer Support]-[Product Information]

■ SOFTWARE DOWNLOAD

The downloaded software may be compressed(.zip).

If the downloaded software was compressed(.zip), please unzip it.

Store the software package to USB memory. (Applicable USB memory : Format by FAT32, USB2.0 type)

However, please store **ONLY ONE** PKG file to USB Root folder for software update.

Software PKG file name format: sony_fw_2017_**1000**_**UUUSB**.pkg

↓ ↓
version **model Name**

Model Name

- 1.KD-60X690E/KD-70X690E(UC2/LA1):UUUSB
2. KD-670X6700E/KD-70X6700E(AZ1/EA4/ME6):UUPAB
3. KD-60X695E(LA8): UUCPB
4. KD-60X697E(CO1):UUCOB
5. KD-60X695E(AR4): UUBRB

SOFTWARE UPDATE BY USB MEMORY

1. Prepare USB with update PKG file, Set TV to AC Off.
2. Insert USB device to TV that contains the new version software.

***Be sure only one PKG file is directly located under ROOT folder of the USB device.

Model Name

- 1.KD-60X690E/KD-70X690E(UC2/LA1):UUUSB
2. KD-670X6700E/KD-70X6700E(AZ1/EA4/ME6): UUPAB
3. KD-60X695E(LA8): UUCPB
4. KD-60X697E(CO1): UUCOB
5. KD-60X695E(AR4): UUBRB

3. Press and hold Power Tact Key for 5s while AC ON TV
4. Wait for a while, If valid file is found, LED change UPDATE mode (Orange is Blink-1sec On / 1sec Off) few second later. From now, all key & Remote are not allowed (no response) until update finish.
(*If AC Off/On with USB memory inserted, UPDATE start again.)

5. When upgrade complete, TV will turn on and LED will be green.

***Please remember to remove USB after upgrade finish.

6. After software update, you will need to do Initial Setup again, so please follow the steps to confirm the settings.
7. Remember to check the software version is same as the target version you want to update.

CONFIRM SOFTWARE VERSION

Remember to check the software version after upgrade.

Product information page will show software version.
