7002721	Mounting Clamp	3
7606537	Food Well	1
8000544	Wiring Diagram	1

The 1509 Food Warmers are built-in food wells. The inside dimensions are 19.9" x 5.6".

The purpose of this device is to maintain Wendy's potato toppings at serving temperature. The well must be filled with hot water, and the thermostat will maintain well water temperature at the dial knob setting.

This unit is not designed to warm the food product from a cold state, only to maintain serving temperature.

The warranty is one year for parts, labor and travel.
